

# Water Heaters

## Residential Electric

- Ideal hot water delivery for households with 3-4 people when sized appropriately
- Two 4,500-watt copper heating elements provide a first hour delivery of 57 gallons
- Premium heating elements, anode rod and fused ceramic tank shield provide superior tank protection and extend water heater life
- Non-CFC polyurethane foam insulation and factory-installed heat trap nipples reduce heat loss for maximum efficiency and energy savings
- Short 49.25-in H x 23-in diameter design is ideal for condensed spaces like under a staircase or a closet installation
- Factory-installed temperature and pressure relief valve and tamper-proof drain valve ensures safe operation
- 6-Year limited tank and parts

## Residential Electric - Lowboy (Optional)

- Ideal hot water delivery for households with 3-4 people when sized appropriately
- Two 4,500-watt copper heating elements provide a first hour delivery of 60 gallons
- Low-profile 34-in H x 26.5-in diameter design with top water connections for easier installation under counters, bathroom vanities or in cabinets
- Premium heating elements, anode rod and fused ceramic tank shield provide superior tank protection and extend water heater life
- Non-CFC polyurethane foam insulation and factory-installed heat trap nipples reduce heat loss for maximum efficiency and energy savings
- Factory-installed temperature and pressure relief valve and tamper-proof drain valve ensures safe operation
- ◆ 6-Year limited tank and parts
